

Effective October 1, 2018, the Veterans Choice Program has been phased out and replaced with a new, permanent program called Patient Centered Community Care (PCCC), also known as Community Care Program. Under this new program all veterans are entitled to chiropractic care. Authorization for this new program will need to come from the local veterans facility.

Currently the program allows 12 annual treatments, which may include decompression therapy as well. Upon completion of these treatments, further appointments, procedures or referrals may be requested if deemed necessary. Additional information will be provided as it becomes available.

**To schedule an appointment with Dr. Olree, please contact us @ 989-734-7144 or call your local veterans facility.**
